Abstract

Many new blockchain projects and emerging talents struggle to gain visibility amidst the vast number of competitors in the blockchain space. Traditional marketing services often fail to adequately promote these projects due to their unique needs and niche audience.

On the flip side, developers and other talents within the blockchain space often find it challenging to discover opportunities that match their skills and interests. Existing platforms may lack the specificity or functionality needed to effectively connect these individuals with suitable projects or collaborators.

Finally, there are concerns around security and transparency within the blockchain space. Users need assurance that the people and projects they interact with are secure and trustworthy, with mechanisms in place to protect their profits. Additionally, transparency is crucial for building trust and confidence among participants in the ecosystem.

By addressing these challenges, SolPages aims to provide a centralized platform that streamlines the way crypto projects and developers discover, connect, and collaborate with each other. Through features like detailed project listings, developer profiles, project validation, secure messaging and connection requests, SolPages creates a more efficient and transparent marketplace for participants in the blockchain space.

Introduction

At SolPages, our team is committed to revolutionizing the blockchain landscape by reimagining how participants navigate its intricate web of projects, talent, and investment opportunities. In an ecosystem teeming with innovation and potential, we recognize the need for a unified platform that brings together diverse stakeholders and facilitates seamless interactions. Our mission is clear: to bridge the gap between talent, projects, and investors, empowering individuals ranging from seasoned crypto enthusiasts to budding professionals.

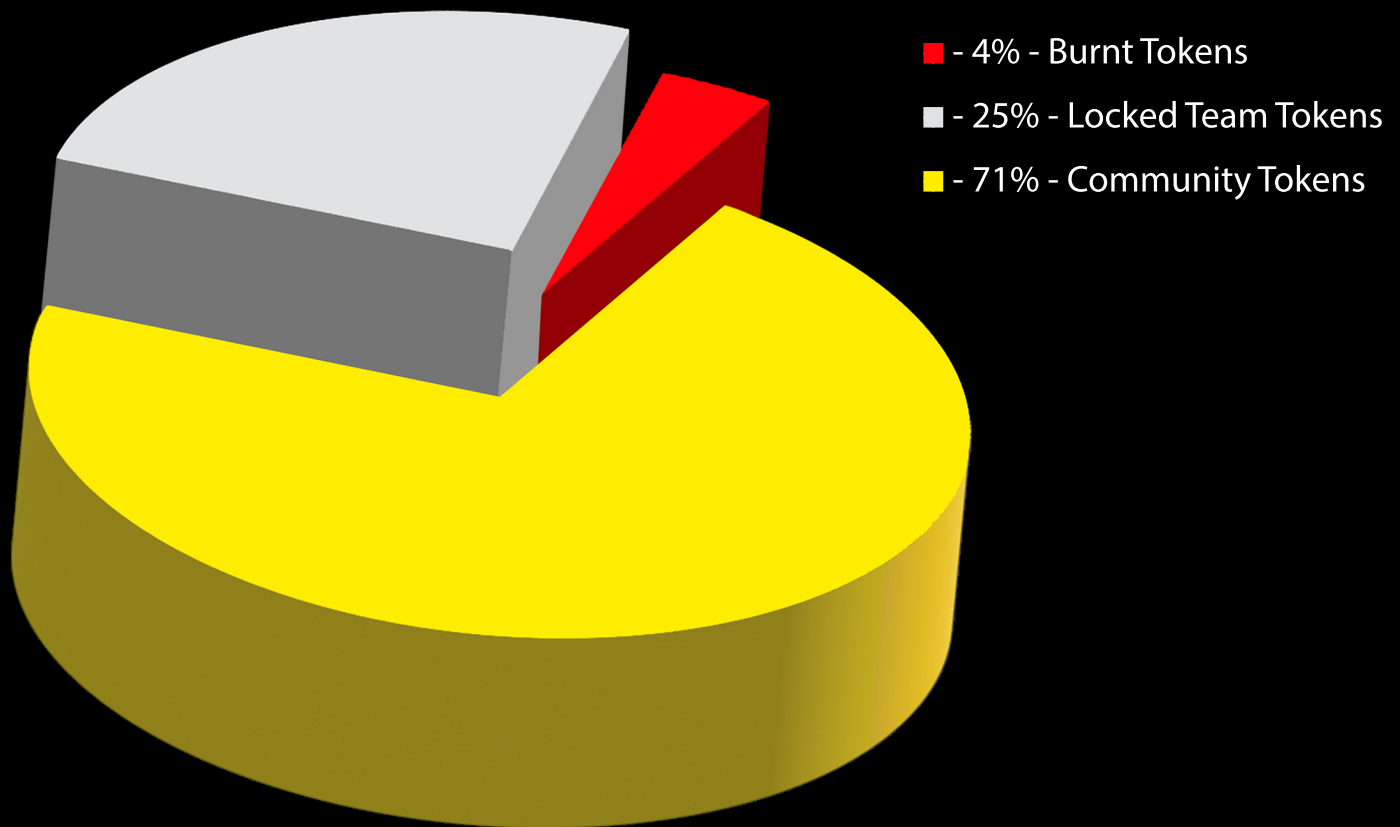

With SolPages, we're not content with merely providing a directory service; we're building a vibrant community where visibility, credibility, and meaningful connections flourish. Gone are the days of struggling to stand out amidst the noise of the blockchain space. Through our platform, users can showcase their projects, skills, and achievements with confidence, knowing that they're part of a trusted network of like-minded individuals.

Our commitment extends beyond just connecting users; it's about fostering a culture of inclusivity and opportunity. We believe in democratizing access to the blockchain revolution, ensuring that everyone, regardless of background or experience, has the chance to contribute and succeed. Join us on this journey as we redefine the future of collaboration and pave the way for a more inclusive and interconnected blockchain ecosystem.

TOKEN

The \$SOLP Token

Original Supply: 1,000,000,000 \$SOLP
Current Supply: 959,984,554 \$SOLP

The \$SOLP Token is the native utility token to SolPages and is key to unlocking the full potential of the SolPage ecosystem. As a non-inflationary token there will only ever be 1,000,000,000 minted and with the 4% already burnt with more burns planned that number will continue to decrease.

Along with this 4% burnt, 25% of the supply has been locked for one year on a three month vested schedule as linked below. This supply was bought by the team on the open market and shows our commitment to the projects long term growth.

Every three months the team will assess the situation regarding the tokens that have been unlocked and will vest those tokens based on the what is deemed beneficial for the community and the further success of Solpages.

Locked contract:

<https://app.streamflow.finance/contract/solana/mainnet/3Re1xLQTQQs8ELfAJQeAsUXLrMGL6ftCzjGxpDxxYDL>

Solpages Revenue

25% Revenue Share + 25% Team, + 50% Project Development
= 100% Solpages

In addition to the various benefits of holding \$SOLP tokens, holders will have the opportunity to receive a share of the SolPage utility profits in Solana directly to their \$SOLP wallets once they reach a certain token threshold. The exact percentage required and the maximum profit share are currently under discussion and may be subject to adjustments as the project and community continue to expand.

This Revenue Share feature will be distributed randomly to discourage token hoarding and will be unlocked when certain conditions are met, such as when funds reach a designated level, during an active/completed project event, or after a specified period has elapsed since the last revenue share distribution.

- - 25% - Team
- - 25% - Revenue Share
- - 50% - Project Development

ROAD  MAP

1 FUNDRAISING AND LAUNCH

- Raise funds (\$50,000+ achieved)
- Utilize funds to build up strong liquidity
- Launch Solpages Token

2 EARLY SUCCESS

- Reach \$100,000 MC (\$250,000+ hit)
- Larger bags to be distributed.
- Begin utility development

3 FIRST UTILITY RELEASE

- Release the first iteration of the LBS Bot to Solpage Community
- Continue Solpages ALPHA development

4 REFINE & REFER

- Test, Gather community feedback, Revise and Upgrade LBS Bot
- Launch Refer n Earn community program

5 REVENUE & PARTNERSHIPS

- Rent LBS Bot to whitelisted TG groups
- Sign several key partnerships deals allowing for project ecosystem growth

6 EXPAND & BUILD NETWORK

- Gain exposure and expand the Solpages community alongside utility adoption
- Release **ITS SUPER SECRET**

Phase 1 - Say Yellow to the Pages

PHASE COMPLETE

Despite a quicker-than-expected launch, our team started strong! Early success saw \$SOLP exceed our Phase 1 MC goal of \$100,000, reaching over \$250,000. This achievement led us to initiate token buy back and burn, and enabled larger holder bag distribution.

Additionally, we kicked off project utility development by creating and releasing the LBS Bot to the community, while also advancing the Solpages ALPHA utility in the background.

These accomplishments have laid a solid organic foundation for the ongoing growth and success of Solpages.

Phase 2 - Let Your Fingers Do the Walking

Our current Phase!

Building on the foundation we solidified during Phase 1, Solpages focus remains on advancing the LBS Bot by refining its features based on test feedback and launching the "Refer n Earn" program to foster further organic growth.

With early success in achieving our market cap goal, we're poised to introduce larger benefits to stakeholders and initiate the development of other utility features that will expand the Solpages toolkit.

7

REWARDS & REVEALS

- Reward the community via Buy Back n Burns, Airdrops and Events
- Release Solpages ALPHA for testing

8

FEEDBACK & FEED BACK

- Improve Solpages from test feedback
- Marketing Solpages Ecosystem via Ads, Partnerships and Utility deals

9

ALMOST GETTING THERE

- Reach \$100,000,000 MC
- Release full utility range
- DEX & CEX Listings

10

IT ALL COMPOUNDS

- Reach \$2,000,000,000 MC
- Invest in our communities and partnerships, growing as a whole together
- Continue to work on and improve the Solpages ecosystem with updated utilities & innovative solutions
- Expand to Multiple Blockchains
- Solpages AI Service Automation
- RWA Expansion
- Continue to make the space a little safer one project at a time

Phase 3 - For the Page People

This phase has the community at its heart. Not only will we be releasing our ALPHA but also be give back to the community who have supported Solpages. This will range from Airdrops to Earn Events while testing the Solpages ALPHA.

Feedback from this phase will drive improvements to Solpages as a whole, complemented by strategic marketing efforts through ads, partnerships, and utility deals.

We aim to roll out comprehensive utility toolkit, and upon reaching the required MC goals secure listings on DEX and CEX platforms.

Together, we're shaping a dynamic future for Solpages, advancing towards greater adoption and impact in the Solana ecosystem.

Phase 4 - SAFU With Solpages

Our vision is clear and ambitious, our goal is to achieve a market capitalization of \$2 billion This will be driven by strategic community and partnership investments, continuous enhancement of the Solpages ecosystem with cutting-edge utilities, and expanding across multiple blockchains.

Leveraging Solpages AI Service Automation and extending our Real-WorldAsset (RWA) Initiatives will further solidify our market position. Above all, Solpages will maintain our commitment a safer Solana, fostering trust and stability as we advance, one project at a time.

TOOLS

LAST BUYER STANDING BOT

Increase volume organically within a community

Test Market Cap increase of 200% and above

Promotes Community Engagement and Growth

Pioneering on Solana, our Last Buyer Standing Bot stands as the first of its kind, marking the launch of our Solpage Utility Toolkit.

We developed the Solpages Last Buyer Standing Bot with a focus on increasing volume and fostering community growth. By leveraging this bot, projects can generate organic trading volume and cultivate a sense of competition and camaraderie within their Telegram communities. This strengthens the project's ecosystem and encourages active participation from their community members.

Our experience shows that the Last Buyer Standing Bot is exceptionally effective in energizing communities during key events such as team raids, AMA sessions, and community updates. It serves as a catalyst for interaction, prompting members to become more involved and invested in the project's success.

HOW IT WORKS

1. Project register interest in bot with our Team.
2. Add Solpages Last Buyer Standing Bot to their TG Channel.
3. Set Solpages LBS Bot parameters such as Dynamic or Static Prize
4. With Dynamic prize selected the prize will increase by X% with each buy and decrease by Y% with each sell. Static prize keeps prize at set level.
5. Each buy resets the timer. When the timer hits 0, the last buy wins informing Bot purchaser of contest end, winning buy amount, winning wallet and prize amount.
6. In theory both the contest length and the prize are limitless, with the possibly growing a project and community endlessly!
